Federal State Budgetary Educational Institution of Higher Education “Omsk State Agrarian University named after P.A. Stolypin”

Dear enrollee!

The faculty of economics and agro-technological faculty of Omsk SAU encourage you to opt for the brand new master's degree programme:

Sustainable agriculture and rural development

Omsk 2018

The programme SARUD focuses on practice-oriented education in the field sustainable agriculture and rural development. As a cross-cutting course at the interface of economics and agriculture, it revolves around the basic concepts of sustainable development recognised worldwide, encompassing all the three pillars of sustainability and dealing with economic matters of social and institutional development, the ecological well-being of rural areas and aspects of agricultural production.

Studying the brand-new course, you will acquire holistic interdisciplinary knowledge, learn how to apply the methods of land use scheduling, agroecosystems assessment and socio-cultural and environmental resources.

By the end of the course, graduates will be able to independently apply the concepts of rural development considering the local specifics.

Our graduates will be eligible to work in public administration bodies and agriculture departments of different levels. They will be able to occupy the position of rural settlement leader or work in research institutes, higher and secondary educational institutions.

The programme offers the following majors (120 ECTS):

Major	Attendance	Entry exams	Admission
Agronomy 35.04.04	extramural 2,5 years	interdisciplinary exam, test	state-financed and self- paid
Economics 38.04.01	extramural 2,5 years	interdisciplinary exam, test	self- paid
