SARUD master program is focused on practical training in the field of sustainable agriculture and rural development. It is an interdisciplinary specialty at an intersection between economy and agriculture.

Future graduates of the program will be able to gain knowledge in the field of economics, management, social sciences, agronomy and ecology, gain access to local and international experience, learn to apply modern methods of land use planning and evaluation of agroecosystems, as well as socio-cultural and natural resources.

After completing the SARUD master program, graduates will be able to independently apply the concepts of rural development to regional peculiarities of local conditions.

Graduates of the program may be employees of organizations of any form of ownership, act as scientific and pedagogical workers.
