Profile of the study program

The SARUD Master's Program "Sustainable Agriculture and Rural Development" focuses on practical education in the field of sustainable agriculture and rural development. It is an interdisciplinary specialty at the interface between economics and agriculture.

The Master's program SARUD considers the basic international concepts of sustainable development, covering all three components of sustainability.

Specialists in the field of sustainable agriculture and rural development will be able to independently apply the concepts of rural development to local conditions.

Profile of the study program

In the process of training on the new educational program "Sustainable Agriculture and Rural Development", the master student will acquire comprehensive interdisciplinary knowledge at the intersection of the following sciences: Economics, Management, Social Sciences, Agronomy, Ecology and learn to apply modern methods of land use planning and agroecosystem assessment, and Social, cultural and natural resources.
